ABSOLUTE PERFECT CONVERSION

HOW WE TRANSFORM LP 640 TO LP670-4 ?

According to its tradition, Lamborghini's new flagship bears the name of a bull -- naturally, a particularly courageous specimen from the world of the Spanish Corrida. Aventador was a bull bred by the Don Celestino Cuardi Vides family that in October 1993 entered into battle at the Saragossa Arena, earning the "Trofeo de la Peña La Madroñera" for the outstanding courage shown during the fight.
